InterfaceFLOR

MODULAR CARPET FOR HOSPITALITY

Mission Zero:
our promise to eliminate
any negative impact our company
may have on the environment
by the year 2020.

We'll change the way you feel *about* carpet tiles

As a global manufacturer of modular carpet, InterfaceFLOR provides high quality flooring solutions for every kind of commercial and residential flooring application. Our carpet tiles come in an extensive range of beautiful colours, textures and leading-edge designs to enhance any hospitality interior and allow you to combine style with functionality.

Running a hotel or any other hospitality venue can be very busy and various tasks can be time-consuming, costly and disrupting to hotel guests – replacing your carpet, for example. Worn, damaged or stained broadloom carpet looks unsightly and can be hazardous to hotel guests or staff if not repaired or replaced. Repairing broadloom can sometimes be a specialist task and usually means closure of an area until the work is complete. This results in disruption to hotel guests, occupancy loss and high costs.

InterfaceFLOR can help make your life easier. How? Imagine a future where you no longer have to replace the whole carpet because of a small damaged area. Our carpet tiles are easy to install, remove and

replace so your own staff could replace a small area, leaving the rest of the floor alone. The result: reduced costs and less disruption to hotel guests and staff.

As part of Interface Inc., a worldwide leader in sustainability, InterfaceFLOR is constantly striving to keep your environment in mind. All our products in Europe are manufactured using 100% green electricity. We also monitor and review all our processes, from raw material acquisition, manufacturing, transport, use and maintenance to final disposal or recycling. In this way we ensure that we reduce our carbon emissions and minimise waste sent to landfill.

When you experience InterfaceFLOR you are assured of exceptional service, great value and attention to detail wherever you are. With manufacturing locations on four continents and offices throughout the world, we can supply sustainable products to meet your needs.

LUXURIOUS *ranges*

For any hotel interior InterfaceFLOR recommends products made with 100% solution-dyed yarn, which is permanently coloured throughout to give the tiles superior colourfastness properties, even when exposed to sunlight. Moreover they are incredibly stain and soil resistant, and can withstand harsh cleaning materials and liquid spillages.

Damaged tiles can easily be replaced by hotel staff, leaving the rest of the floor alone.

The Pond Collection - *Weimar Mushroom*

CREATIVE *flexibility*

InterfaceFLOR carpet tiles can keep your hotel interior smelling fresh through the incorporation of Intersept®, our patented antimicrobial treatment for the control of mildew and the prevention of odours.

Modular carpet means less work and is quicker to install than conventional carpet. Even stairs and skirtings are easily accommodated.

The wide range of colours and designs offered by InterfaceFLOR gives greater creative flexibility and more opportunity for change.

Main - Equilibrium *Parity*

STYLISH *comfort*

An InterfaceFLOR random design gives even greater flexibility and opportunity for change, as there is no right or wrong way to lay the tiles. It also means that no two floors need ever be the same! These designs are cost-effective: in an average 1800m² installation of unpatterned broadloom carpet 13% of material is wasted, whereas our random designs produce near zero waste - not only saving you money but also reducing the amount sent to landfill.

Our tiles are dimensionally stable, which means they won't stretch or shrink. Choosing a cushion-back option provides increased comfort and sound absorption, and offers an ideal alternative to conventional carpet.
